WORLD RANK	DRIVER NAME	TRUCK NAME	SCORED RACES	POINTS	POINTS RANK	AVERAGE	AVERAGE RANK	RANK SCORE	WINS	2NDS	HEAT WIN %	SCHEDULE STRENGTH	FIELD SIZE	FINALS FACTOR
---------------	-------------	------------	-----------------	--------	----------------	---------	-----------------	---------------	------	------	---------------	----------------------	---------------	------------------

- The world rankings are ordered based on each driver's Rank Score. World rankings are a measure of racing success and not necessarily driver skill.
- SCORED RACES are reported events where points have been awarded. This excludes unreported events, events with insufficient information, events without racing, exhibition events, and other events that do not meet MTROC criteria.
- POINTS is the sum of points a driver has earned throughout the season.
- POINTS RANK is a driver's ranking based on his or her POINTS total. This ranking is used to determine the RANK SCORE.
- AVERAGE is POINTS divided by SCORED RACES and shows the average number of points a driver has earned at each event.
- AVERAGE RANK is a driver's ranking based on his or her AVERAGE total. This ranking is used to determine the RANK SCORE.
- RANK SCORE is the sum of the POINTS RANK and AVERAGE RANK. The WORLD RANKINGS are determined by ordered each driver's RANK SCORE from lowest to highest.
- WINS is the number of event wins a driver has achieved in this season.
- 2NDS is the number of event runner-ups a driver has achieved in this season.
- HEAT WIN % is the driver's approximate winning percentage in head-to-head competition. This value is calculated based solely on round advancement, and does not (yet) consider bye runs, fast losers, or replacements.
- SCHEDULE STRENGTH (also known as COMPETITION CALIBER) is an average score based on the 2019 rankings of the competitors at the selected driver's events. Each driver is assigned a weight based on his or her finish in the previous season. (The top five get 1.500, those below 100th and all rookies receive 0.500) The weights of all drivers at an event are averaged to determine the COMPETITION CALIBER of that event. A higher number (usually above 1.000) means that the field contained many highly-ranked drivers. A field with only unranked drivers will have a competition caliber of 0.500. The SCHEDULE STRENGTH is the average of these scores based on each driver's unique schedule.
- FIELD SIZE is the average number of drivers competing at the events at which the selected driver has competed.
- FINALS FACTOR is a measure of how often a driver competes in the final rounds of an event. A driver scores 100 for each final round, 75 for each semi-final, and 50 for every other placing. A FINALS FACTOR of 100.00 means that the driver has competed in the final round at everyone of his or her events. A FINALS FACTOR of 50.00 means that a driver has never advanced to the semi finals.

	1	Austin Minton	Jekyll & Hyde	192	First	Fatal Attraction	defeated	Prime Time
	2	Devin Jones	Barbarian	128	First	Jekyll & Hyde	defeated	Iron Outlaw

	DNC	Daron Basl	Tantrum		FINALS	Jekyll & Hyde	defeated	Barbarian
	DNC	Aaron Basl	Devastator					
	DNC	Ron Nelson	Bustin' Loose					
					Barbarian did complete his bye run after Tantrum failed to reach the starting line in time. Since this was a scheduled heat that was affected by breakage, and also since Barbarian completed the bye-run, MTROC officials are considering this a valid win and so points are awarded even though Barbarian did not literally face an opponent before the finals.

	DNC	Aaron Basl	Devastator					
	DNC	Ron Nelson	Bustin' Loose					
					* Bustin' Loose and Fatal Attraction both broke before racing, so no one advanced out of their originally-scheduled heat. Prime Time was brought back as fast loser, and received a bye run in the semi-finals because of this. MTROC officials have decided that this was not a valid way to advance since there were no actual heats run on that side of the bracket. The field is treated as a 4-truck event with the final in-person heat being scored as an exhibition run.
